6	Joe Laney. x	MU	160.00	164.02	138.01	462.03	

Relatively cool temps and treacherous fishtailing tailwinds greeted the shooters at the end of August Long Range match. The new uprights worked splendidly so set up was greatly facilitated. We started with 19 registered shooters but after the 5th target went down and a mysterious and extended Access Point connection problem, the 3 attending match directors took a bullet for the team and dropped out to get the match back on track. So here's how it went for the 16 remaining shooters.

In F-Class, Dan Harris-F-Open shot a 575-11x to take Match Winner, Mark Cheesbro-FTR with a 557-7x was 1st F'er and Dan's brother Kevin was 2nd F'er.

In the Sling class Cameron Keating topped the Master/Sharpshooter class with a 586-22x, Boris Batkin took 2nd Master with 579-18x and Darren Rosenbaum shot a 577-21x for 3rd Master.

Paul Schultz was 1st High Master with 579-14x, Rob Ableson had a 577-20x for 2nd High Master and Match Winner and high score/X count for the day was Marc Mitty with a 588-24

Hope to see you all at the next Long Range match which should be November 29th. That's on a Sunday this time. Believe the wind, because it's smarter than you are.
