<p>Very cold start for the day...and windy. After setting up the range the wind settled a bit and we started with...</p>								
<p>Barricades - 10 shots from a wooden sawtooth shaped framework. Par time 3 minutes. <b>Henry S</b> had an excellent score of 8/10 to take this stage.</p>								
<p>Know Your Limits-KYL - 10 shots at a set of 5 steel targets ranging from 10" to 3" scored in increasing value from 1 to 5. If you miss, your score is zero and you must start over. Clean the 5 and you may keep those points and start over and keep any points thereafter. <b>Steve</b> did just that and racked up an impressive score of 18/30</p>								
<p>Spinner - 10 shots to get the "spinner" spinning and if you do you get to keep the points (1 per hit). <b>Darren</b> seems to know his way around a spinner-10/10.</p>								
<p>Timed Exposure -</p>								
<p>Movers -</p>								
<p>1,000 Yards - A thousand yards...better bring out the big guns, right? Wrong! this stage is unlimited round count, shooting at a 12" round plate set at roughly 1,000 yards, par time 40 seconds. <b>Henry G</b> was shooting his .223 bolt gun all day with underwhelming results, although he nearly got the spinner to go round but a feeding issue caused a lost opportunity. So, we didn't expect the puny 75gr. pill to get the job done, better leave it to the big boys. Henry G, however, proved the sometimes overused adage "It's not the arrow, it's the Indian." and racked up the high score for this stage, 3/?. Well done, brave.</p>								
<p>So <b>Steve Goldman</b>, again takes home the crown of Match Winner. This is Steve's second win in row, he might be thinking of going pro pretty soon.</p>								
<p>I want to thank Hal Dennis for his help during the match. He was also instrumental in getting Greg to participate in the Tac match. Incidentally, Greg performed well for his first Tactical match here at BRRC. Many first time shooters here have been skunked on their first try. Hope to see you at the next match.</p>
