Wonderful weather again on this second day of summer. We shot from the High-power line again with the same COF as in May.

Stage 1) Cold Bore, 387 yards, 1 shot 1 Point Possible (PP). Everybody won, YAY!

Stage 2) Barricade, 191, 299, 387 yards. 2 shots each at 4 loop hole stations, 3 stations at 191 and 299, 1 station at 387 yds. (timed for tie breaker), 8 PP. **Martin**, 1 hit shy of a clean, proudly won this stage.

Stage 3) Spinner, at 283yds., 10 shots, get spinner to spin=1pnt., transition to torso at 387yds. and continue shooting until ammo is expended. Each hit on torso=1pnt. **Connor** took this stage with a 7.

Stage 4) KYL (Know Your Limits), Clean KYL=5 pnts., trans. to steel plate at 599yds. and continue shooting until ammo is expended. Each hit on plate=1pnt., 10 PP. **Steve** cleaned this stage with cool precision.

Stage 5) Timed Exposure, Timed X - 600yd, 5rnd, 5x3sec. exposures of an 8.5"x11" colored cardboard square on a 1"x2"x6' stick. Each shooter is assigned a color and must engage it when exposed at random points along the target berm. **Steve**, again cleaned this stage...he's so fastidious, in a good way.

Stage 6) Moooo-vers, IPSC cardboard torsos with corresponding color (from Timed X), 15rnd, 5x15sec. exposures, 15 PP. All targets appear at random points along target berm and move at patrol speed (@1.5mph) for 15 sec., then they are lowered and the sequence repeats 4 more times. **Martin's** 5 hits was good enough to take this stage.

Connor Taberski MW- Connor started shooting with us in February and by May took 2nd Place. And now, 1 month later he's Match Winner. This is his 3rd match with us and as far as I know, his 3rd tactical match ever. He's active duty military and we're glad to have this hard charger, no charge, anytime.

See y'all August 24th, COF TBD
